

Zulma Rocio Martinez

Frontend Developer · React · TypeScript · Next.js

Bogotá, Colombia · zrmartinezg@gmail.com · zulmamartinez.dev · linkedin.com/in/zulma-rocio-martinez · github.com/Rocio01

Summary

Frontend developer with 4+ years building production web applications in React, TypeScript and Next.js. As the main frontend developer of a UK healthcare platform, worked across the full lifecycle — architecture, API integration, testing and deployment — and contributed backend work in Python/Flask. Comfortable working autonomously in remote, English-speaking teams.

Skills

Frontend: React, TypeScript, Next.js, JavaScript, HTML, CSS, Tailwind CSS

State & data: TanStack Query, Zustand, Zod, REST APIs

Auth, infra & tooling: Auth0, Cloudflare Pages, Git, Figma

Testing: Cypress (E2E), Vitest

Backend: Python, Flask, SQLAlchemy

Experience

Frontend Developer — Cressco (Remote, Bogotá)

Jun 2022 – Sep 2026

- Main frontend developer for a UK healthcare care-management platform (React, TypeScript, Next.js), working across architecture, feature development, QA and releases.
- Took part in an API architecture migration, refactoring data flows and component structure across the application.
- Built a reusable data-table component with server-side pagination and filtering.
- Built the scheduling module: one-off and recurring appointments (RRULE), cancellation flows, and check-in/check-out.
- Integrated Auth0 authentication, handling token expiration, automatic logout, and sessions in browsers that block cookies.
- Worked with production, staging and release environments on Cloudflare Pages: each release went to a client-acceptance environment for sign-off before production. Wrote Cypress E2E tests for critical flows.
- Contributed backend features in Python (Flask, SQLAlchemy).

Projects

Portfolio

zulmamartinez.dev

- Personal site in English and Spanish with light and dark themes. Next.js static export, TypeScript, Tailwind CSS; unit and E2E tests in CI; deployed on Cloudflare Pages.

Attention training game

github.com/Rocio01/juego-atencion

- Cognitive training web app built for my parents, with difficulty that adapts to each player (staircase algorithm). Vite, React, TypeScript, Cloudflare Workers.

Education

Microverse — Full-Stack Web Development Program (Remote)

Aug 2020 – Jan 2022

- Intensive remote program based on pair programming with developers across international teams.
- Built projects with HTML, CSS, JavaScript, Ruby on Rails, React and Redux.

Languages

Spanish (Native) · English (Advanced)
