Zulma Rocio Martinez

Frontend Developer · React · TypeScript · Next.js

Bogotá, Colombia (Remote) · zrmartinezg@gmail.com · zulmamartinez.dev · linkedin.com/in/zulma-rocio-martinez · github.com/Rocio01

SUMMARY

Frontend developer with 4+ years building production web applications in React, TypeScript and Next.js. As the main frontend developer of a UK healthcare platform, worked across architecture, REST API integration, testing and releases, and contributed backend work in Python/Flask with SQLAlchemy and MySQL. Comfortable working autonomously in remote, English-speaking teams.

SKILLS

- **Frontend:** React, TypeScript, JavaScript, Next.js, HTML, CSS, Tailwind CSS
- **State & data:** REST APIs, TanStack Query, Zustand, Zod
- **Testing:** Cypress (E2E), Vitest
- **Tooling & deployment:** Git, Cloudflare Pages, Auth0, Figma
- **Backend & data:** Python, Flask, SQLAlchemy, MySQL
- **AI-assisted development:** Claude Code

EXPERIENCE

Frontend Developer — Cressco (Remote, Bogotá) *Jun 2022 – Sep 2026*

- Main frontend developer for a UK healthcare care-management platform (React, TypeScript, Next.js), working across architecture, feature development, QA and releases.
- Took part in an API architecture migration, refactoring data flows and component structure across the application.
- Built a reusable data-table component with server-side pagination and filtering.
- Built the scheduling module: one-off and recurring appointments (RRULE), cancellation flows, and check-in/check-out.
- Integrated Auth0 authentication, handling token expiration, automatic logout, and sessions in browsers that block cookies.
- Worked with production, staging and release environments on Cloudflare Pages: each release went to a client-acceptance environment for sign-off before production. Wrote Cypress E2E tests for critical flows.
- Contributed backend features in Python (Flask, SQLAlchemy) on a MySQL database.
- Worked on a Python pipeline (Aug–Sep 2026) that scrapes UK public tenders from Find a Tender, uses GPT to classify each notice into service categories and ranks them with a deterministic scorer before writing to Google Sheets and sending alerts. Contributed to deduplication, handling of the portal's limits and blocks, tests, and secret scanning in CI. Worked with Claude Code as an AI coding assistant: directed it, reviewed the code it generated and covered it with tests.

PROJECTS

Portfolio — zulmamartinez.dev

- Personal site in English and Spanish with light and dark themes. Next.js static export, TypeScript, Tailwind CSS; unit and E2E tests in CI (GitHub Actions); deployed on Cloudflare Pages.

Attention training game — github.com/Rocio01/juego-atencion

- Cognitive training web app built for my parents, with difficulty that adapts to each player (staircase algorithm). Vite, React, TypeScript, Cloudflare Workers.

EDUCATION

Microverse — Full-Stack Web Development Program (Remote) *Aug 2020 – Jan 2022*

- Intensive remote program based on pair programming with developers across international teams.
- Built projects with HTML, CSS, JavaScript, Ruby on Rails, React and Redux.
